

2016 Synergistix Users Conference INNOVATION THROUGH COLLABORATION

Matt Hutcheson

Prior to founding Tegra Analytics, Matt served as the Vice President of Development for a pharma consulting firm, and served as an outcomes research analyst. During his time at Cornell, he taught seven statistics courses as an Assistant Instructor and worked at Data Description, Inc. where he conducted statistical consulting and data analysis in addition to developing and designing the TREWESS (trimmed resistant weighted scatterplot smooth) module of the Data Desk® software package.

Matt's superior analytical skills and expertise building statistical models in the areas of compensation design, forecasting, segmentation, target marketing, sales force alignment, performance measurement and outcomes (cancer, anesthesia, pain, women's health, HIV/AIDS, cystic fibrosis, pneumonia, coronary heart disease) on many projects have won him praise from many clients. He possesses the ability to manage, maintain and manipulate large databases as well as the talents to create graphics, interactive scripts, and reports for web sites which has resulted in several prestigious awards.

Matt is an adjunct professor at Delaware Valley University and teaches Statistical Data and Research. Matt graduated with honors from Cornell University where he received both his Masters of Science in Statistics in 1995 and a Bachelor's of Science in 1992.
